COMPANY OVERVIEW

The Trusted Sovereign AI Platform

Get real value by owning your AI. H2O AI Cloud gives you the software and expertise to run predictive, generative, and agentic AI anywhere, from the cloud to fully air-gapped.

TRUSTED BY THE WORLD'S MOST REGULATED INDUSTRIES

AT&T · citi · Commonwealth Bank · NIH National Institutes of Health · PROGRESSIVE · State Farm · WELLS FARGO

2M+	20,000+	Half	10+ yrs
data scientists	organizations	of the Fortune 500	running AI in production

MADE FOR YOUR INDUSTRY

Financial services

Fraud prevention and customer engagement for banks, capital markets, and insurers.

Healthcare

Patient and care team support, from early-warning risk scores to clinical documents.

Telecommunications

Customer engagement at call-center scale, plus fraud prevention and field operations.

Government

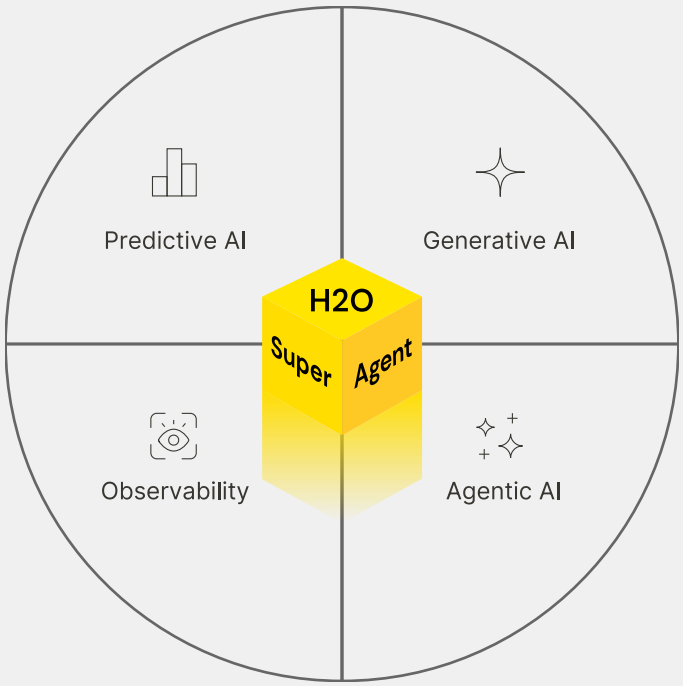

Mission and citizen services with agentic automation on a FedRAMP High certified cloud.

H2O AI CLOUD, THE SOVEREIGN AI PLATFORM

One platform to get to AI production faster

Pilots stall when every capability lives in a different tool. Here, predictive, generative, and agentic AI and observability share one platform, orchestrated by H2O AI Super Agent.

H2O AI SUPER AGENT

One agent runs all four

It sits at the core of the platform and orchestrates Predictive, Generative, Agentic AI and Observability as one working system, so nothing runs in a silo.

ORCHESTRATION · MULTI-AGENT WORKFLOWS · DEEP RESEARCH · TOOL & AGENT BUILDER

#1 on FutureX in three separate weeks of 2026.

WHAT IS H2O AI SUPER AGENT?

The orchestration layer at the core of the platform

Use

Give H2O AI Super Agent a goal in plain English, and it does the work across the platform. It doesn't replace what you run. It operates it.

Orchestrate

Many built-in tools, plus any tool you connect over MCP. Read the plan before it runs, and keep the agents you already wrote.

Manage

Every step is logged, evaluated in Eval Studio, and cost-attributed per user and task, with human approval gates wherever you set them.

WE RUN IT

H2O AI Managed Cloud

A dedicated, single-tenant cloud that H2O.ai provisions, operates, and secures in the region you choose.

AWS · AZURE · GOOGLE CLOUD

YOU RUN IT

H2O AI Hybrid Cloud

A private cloud you operate, in your own cloud, on-premises, or fully air-gapped.

CLOUD · ON-PREMISES · AIR-GAPPED

GOVERNMENT

H2O AI Cloud for Government

FedRAMP High certified, so agencies can run predictive and generative AI and own every model and result.

FEDRAMP HIGH

PLATFORM CAPABILITIES

Predictive, generative, and agentic AI, with observability pre-integrated and working together in one platform.

PREDICTIVE AI

Predictive AI that reaches production, and stays there.

Forecast demand, score risk, detect fraud, and explain every prediction to a regulator. Built on the AutoML engine that has run inside banks and telcos for a decade.

- **Automated feature engineering,** model selection, and tuning
- **Explainability built in:** reason codes for every prediction
- **Predictions without training** from foundation models

30%

less fraud at Commonwealth Bank of Australia

GENERATIVE AI

Generative AI on your data, your models, your terms.

Answer from your documents with citations. Fine-tune small models you own. Run any LLM from any host, all inside your perimeter.

- **Agentic RAG with citations** across your documents
- **Any model, any host,** with cost controls per user and team
- **A secure model factory** to fine-tune and serve small models

90%

lower cost on call analytics at AT&T

AGENTIC AI

Agents that get work done. Governance that lets them.

Make agents, orchestrate them across the tools you already run, and manage them with the same audit trail a regulator expects of a model.

- **Make agents, or use ours:** nine agent types ship ready
- **Orchestrate, don't rebuild:** MCP tools and the agents you run
- **Manage every agent action:** logged and cost-attributed

3x

faster call analytics at AT&T

OBSERVABILITY

See what your AI is doing. Understand why. Prove it.

Explainability for every prediction, evaluation for every agent, drift and fairness monitoring for every model, and one audit trail across all of it.

- **Model documentation,** written as the model trains
- **Evaluate RAG and agents** before they reach a customer
- **Monitor in production** for drift, accuracy, and fairness

One

audit trail across the whole platform

WHY SOVEREIGN AI

You own your agents, models, data, and results, and run them anywhere.

The model comes to your data, not the other way around. You keep the weights, the learning, and the results, and no vendor or rival learns from what you send.

NO DATA SHARING | NO MODEL EXFILTRATION | EXPLAINABLE BY DESIGN | HUMAN-IN-THE-LOOP | AUDIT-READY TRAILS

CUSTOMER PROOF

Outcomes in the world's most regulated industries

Commonwealth Bank

76%

lower customer scam losses

Commonwealth Bank of Australia trained 900+ analysts on H2O.ai and built 50+ generative AI use cases across the bank.

CUSTOMER QUOTE

> Every decision we make for our customers, and we make millions every day, we're making those decisions 100% better using H2O.ai.

Commonwealth Bank of Australia

AT&T

80%

less fraud at AT&T

AT&T runs H2O AI Super Agent inside Ask AT&T, across customer experience, fraud prevention, and field operations.

NIH National Institutes of Health

8K

employees assisted in real time

NIH runs Enterprise h2oGPTe fully air-gapped across 28 institutes, with no public internet connection.

$100M	15x	4x	100x
annual fraud savings	faster model production	margin per client	more fraud caught
LARGE NORTH AMERICAN BANK	CISCO	BANCO DO BRASIL	IFFCO-TOKIO

WHY H2O

The software and the expertise to run AI in production

Integrated platform

One system for predictive, generative, and agentic AI. Any model, no lock-in.

Production expertise

Kaggle Grandmasters and Forward Deployed Engineers who stay until it ships.

Cost certainty

A capacity-based annual license, not per-token pricing that spikes as you scale.

Proven at scale

In production for over a decade at banks, telcos, and government agencies.

Start owning your AI at h2o.ai

One platform. Complete sovereignty. Measurable results. SOC 2, HIPAA, and FedRAMP High.
